Sloping or Uneven Sites Page 6

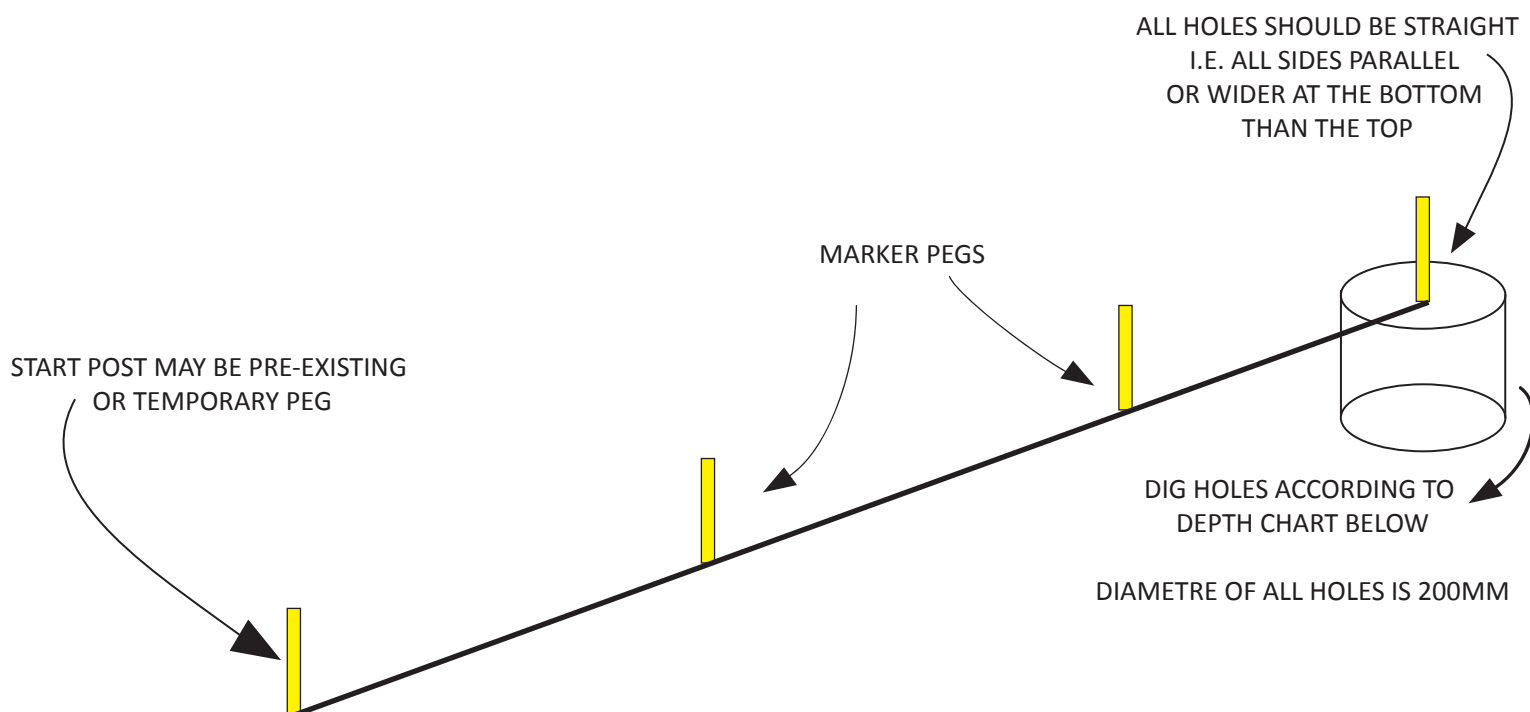

ColourRail Gates Page 6

Additional Information Page 8

STEP 1.

Mark out your plot holes as demonstrated below.

STEP 2.

Check soil type to determine minimum hole depth.

IMPORTANT

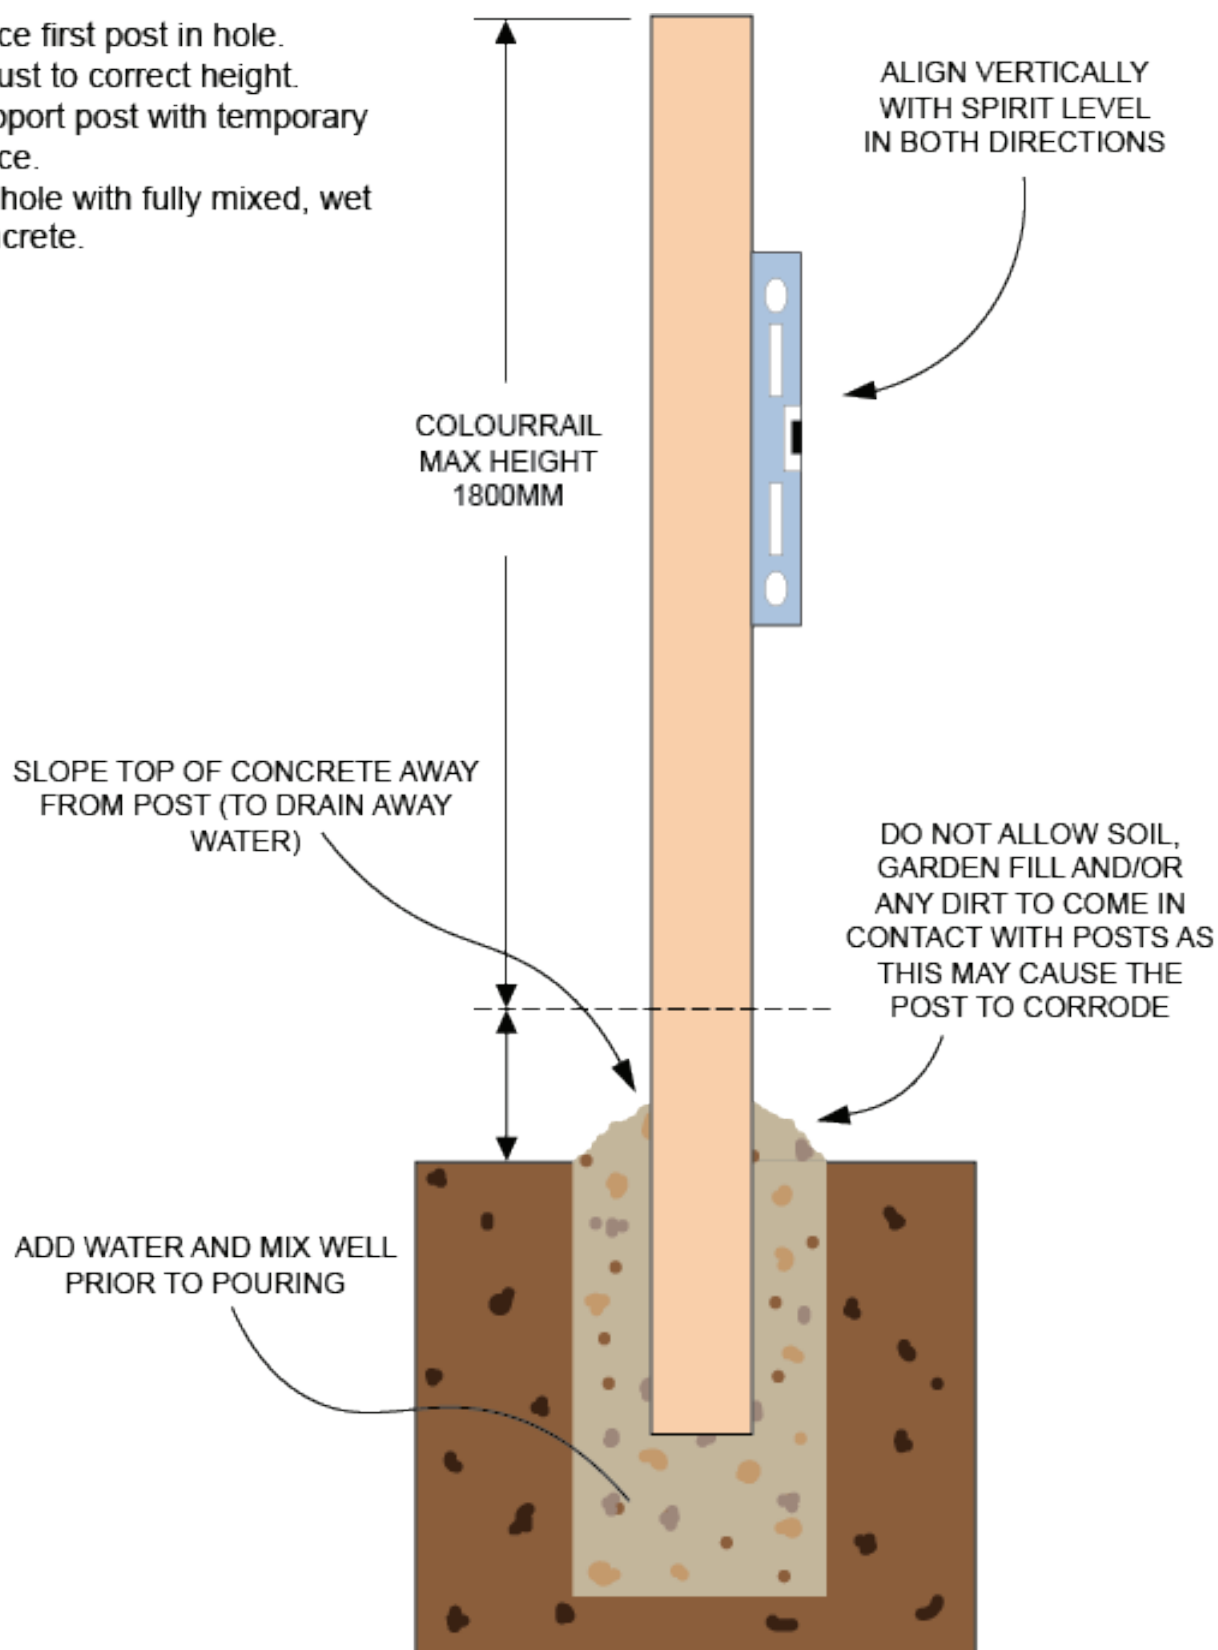

SOIL TYPE	MINIMUM HOLE DEPTH	APPROXIMATE CONCRETE REQUIRED
Rock	300mm	1 Bag per hole (20kg bag)
Clay/Firm Earth	600mm	2 Bags per hole (20kg bags)
Sand/Loose Fill	900mm	3 Bags per hole (20kg bags)

STEP 3.

Fixing posts in ground

- Place first post in hole.
- Adjust to correct height.
- Support post with temporary brace.
- Fill hole with fully mixed, wet concrete.

STEP 4.

Attaching your ColourRail in the railing brackets.

1. Line up your railing panel with the brackets on the post.

2. Push railing into both brackets.

3. Insert post into ground. Line up with other end of ColourRail panel.

4. Move post towards railing and push to secure it in place.

5. Finished ColourRail panel. Repeat until you're design is finished.

STEP 5.

ColourRail Gate Installation

1. Ensure there is ample space for the single leaf gate to sit and swing open-closed.

2. Make sure gate style's height lines up with any pre-existing railings.

3. Mark where the hinges will need to sit with a pencil.

4. Drill pilot holes where you have marked.

5. Use self-drilling screws to secure hinges in place. Follow gate lock instructions to securely add additional items to your ColourRail Gate.

6. Refer to Magnetic Lock's install guide for assembly.

Finished ColourRail Gate

Additional Information

Any additional information can be placed here.
